

TMA POLICY

FILLING POOLS / WATERING LAWNS / HOT TUBS

Effective 3/20/2024

Customers will not be charged for sewer on the number of gallons of water used to fill swimming pools, hot tubs or watering lawn as long as the following requirement is met:

The meter must be read by Customer and recorded **prior to** and **after** filling the pool, hot tub, or watering the lawn and provided to the Water Authority Bookkeeper **in writing** prior to the date of the next quarterly invoice (April-June issued on July 10th and July-September issued on October 10th).

- **Example:**
Customer uses a total of 15,000 gallons per the reading of the meter by TMA personnel at the end of the quarter and has provided in writing that they used 7,000 gallons to fill the pool, hot tub or water lawns. The customer will pay the **full amount for the 15,000 gallons of water** but only **8,000 gallons of sewer**.
- A discount on sewer will **only** be given when the Customer provides the necessary verification of number of gallons used and it is within the current quarter, otherwise they will pay the full price for the sewer portion of the invoice.
